Profile

I'm Abdo, a web developer in Cairo, working remotely for stores in the Gulf and Europe. I build and fix Shopify, Salla and WooCommerce stores: theme fixes, custom Liquid sections, mobile speed, and integrations that move orders into accounting tools like Wafeq and other APIs.

I also build full-stack apps in TypeScript (Next.js, Node, PostgreSQL). I work in writing, on a duplicate theme, at a fixed price, with every account in the client's name. Cairo is CET+1.

★★★★★ 13 public client reviews · 5.0

Selected work

Twelve client projects. Concepts and the full list are on the site.

Qayd
Salla / Shopify → Wafeq

Every order becomes a correct invoice in your accounting, without typing it twice.

Real work, anonymised, shown on demo data.

Véro
WooCommerce · Knitwear

A store that dresses like the brand, with size charts and clear shipping.

EVCARS
Shopify · EV accessories · UAE

Pick your car once, and every page shows what fits it.

evcars.me ↗

Healthy Meals
Salla · Meal plans · Arabic

The owner's own mockups, built into a working Salla store.

healthymeals1.com ↗

Ibrahem Bakheet
Personal brand

A personal site he edits by chatting with ChatGPT or Claude.

ibrahembakheet.online ↗

EZI × O2PRO
3D product page

A lightweight 3D product page built from the client's PDF brief.

H2A
Shopify · Off-Shopify rebuild · demo · Streetwear

A Shopify store built to sell from the phone, plus a working rebuild off Shopify with its own checkout and riders.

h2aa.store ↗

Berber House
Shopify · Rugs · Finland

Handwoven rugs sold one piece at a time, with the thread they came from.

berberhouses.com ↗

Fancy Care
WordPress · Clinic · Riyadh

Bookings from the phone straight into an Arabic dashboard.

fancycare25.com ↗

Pathology Bro
Laravel · Education

A learning platform with a question bank and games.

pathologybro.online ↗

Archidot
Salla + custom site · Architecture studio

Kept the store on Salla for Tabby and Tamara, built the brand site next to it.

archidot.pages.dev ↗

Adham & Jannah
Cloudflare Pages + D1 · Wedding invitation

One link for every guest: the day, the place and a way to say yes.

aj1212.pages.dev ↗

Experience

Independent Full-Stack Engineer — *tamim.works*

Design, build, launch and maintain websites, stores and web apps for clients and for my own products: the twelve projects on page one, plus:

- **Signature Platform**, a sales-training SaaS for real estate (Next.js, TypeScript, Supabase, Gemini): an AI buyer that reps practise calls against by voice and text, an AI evaluator whose scores are schema-checked before anyone sees them, and a multi-tenant CRM with CSV lead import.
- **Signature**, a live online-course platform (Next.js, Supabase): learner dashboard, certificates, checkout with an Egyptian payment gateway, and an admin panel for payments, refunds and support.
- **Outfred**, an Arabic-first AI fashion app of my own: a stylist that answers only from real products found by vector search, visual search, and scheduled catalogue sync.
- Tools: a Chrome-extension agent that drafts replies to client requests behind safety gates and a human handoff, and Electron desktop apps with Gemini function calling where every write needs the user's confirmation.

Full-Stack Web Developer — *Mega Zone*

Built web-app features across the interface, backend logic, databases, authentication and REST API integrations.

Front-End Developer — *Bosta*

Built responsive interfaces for logistics workflows, operations dashboards and shipment journeys.

Front-End Developer — *noon*

Built mobile-first e-commerce screens: product discovery, product pages, cart and account.

Additional experience

Enterprise Technical Support

Concentrix, VXI Global Solutions, Teleperformance

Expedia travel support on Amadeus GDS (bookings, changes, fare rules, refunds); AliExpress customer support in German by chat and email; Microsoft Windows activation and account troubleshooting.

Skills

Platforms

Shopify (Liquid, themes) · Shopify Markets · Salla · WooCommerce · WordPress · Laravel

Frontend

HTML & CSS · JavaScript · TypeScript · React · Next.js · Tailwind · Arabic & English RTL · Three.js

Backend

Node.js · Express · PHP · PostgreSQL · Supabase · Redis · Cloudflare Workers · REST APIs & webhooks

Integrations

Wafeq accounting · Shopify Payments · PayPal · Klarna · Payment gateways · GA4 & GTM · Meta Pixel · Meta Graph API · Gemini & OpenAI APIs · MCP servers

Tools

Git · GitHub Actions · Cloudflare Pages · Vercel · Playwright · Vitest · Figma · Claude Code · Codex

AI is a tool in my workflow. The decisions, the checks and the responsibility are mine.
